Accessories for guardrails

Our range of accessories has been developed over the last few years often according to our customers suggestions; an evidence of our commitment to offer a large choice of solutions adapted to most situations.

► Motocyclist protections TM18 - T18 T22 - T40BP

A tested protection device complying with French regulations. Panel fitting all our guardrail systems and post spacing (2 or 4 m).

Standard powder coated panel (RAL 7008) ; height 37 cm , length 4.32 m with model T connection to post and terminal type U : H 37 cm - L 40 cm

► T.A.T. transition for TM18 - T18 - T22

T.A.T. transition for TM18 - T18 - T22 to W beams and Euro ET end terminals.

Make possible transition between wood & steel and adaptation to steel connections for bridges approach. Crash tested according to ENV 1317-4

► Reflec'bois for TM18 - T18 - T22 - T40 - T40BP

Especially designed by Tertu, this diameter 8 cm round log does fit perfectly our barriers.

With its class II retro-reflective strip (French standard) placed on an aluminum base, it is a highly effective signage product.

► Connection to walls for TM18 - T18 - T22

A steel device designed to connect our wood & steel guardrails TM18, T 18 & T 22 to all concrete walls.

Pre-assembled component including 1 m long guardrail, powder coated end piece bolted to the wall, wooden spacer and standard fishplate TL 62

► Handrail extension for TM18 - T18 - T22 - T40BP

Powder coated steel device adaptable to all our wood & steel guardrails ; with two off-set arms placed on fishplates hardware and a steel hoop to accommodate the 12 cm diameter half round wooden handrail.

► Wooden cladding TM18 - T18 - T22

The C post planed wooden cover does slide inside post wings, giving to the spacer + post unit the appearance of a complete diameter 18 cm round log.

An anti-vandalism especially design fastening item is available upon request.

A steel U-profile wood covering is available for our TM18, T18 and T22 models.

It is designed to cover the steel reinforcement, which is pre-drilled for securing wooden pieces of 4 m and 2 m in length using screws.

Optimized solutions

With adapted answers, appropriate prices and user friendly solutions the Tertu technical support & assistance does respond to 100% of your needs.
